To Whom It May Concern:

In our maintenance business we have been applying AquaBella Organics to 15 of our aquariums for the last 4 months. The results are remarkable in the fact we have not had to do any water changes only the normal top off. The water is crystal clear and the sludge on the bottom is virtually gone. In the past, we needed phosphate removers, water clarity products, algae destroyers, sludge removers, charcoal in the filters and other products to help maintain the water to its proper pH. With the use of AquaBella Organics our carrying case is much lighter, our costs of purchasing products is smaller and our time spent on maintenances is shorter. AquaBella Organics is a great product and we intend to use it always. We are sold on AquaBella Organics!
