

Ideal for Drip Lines, Tape and Pipes

- All-natural Bio-enzyme
- Restores clogged irrigation system to 100% capacity
- Single solution for clearing irrigation systems
- All-in-one treatment to maintain irrigation lines
- Rapidly cleans out hydroponic and nutrient water reservoir accumulations
- Biofilm Buster can be used during the grow season without harming the plants unlike harsh chemical treatments

Irrigation lines are cool and damp – perfect conditions for biofilms and other clogs to form.

BIOFILM BUSTER APPLICATION DIRECTIONS

- 1 Only use non-chlorinated water with BioFilm Buster.
- 2 Set the injector ratio to 1:500. At this ratio, 1 Gallon of BioFilm Buster is good for 500 gallons of water.
- 3 Run system until BioFilm Buster is injected throughout the irrigation lines.
- 4 Turn system off and allow BioFilm Buster to sit in the irrigation lines for at least 8 hours.
- 5 Turn system on and water plants as normal. Irrigation lines will be cleared of any build-up and clogs.

Can be applied directly through a 500 Gallon reservoir rather than injector

BIOFILMTM BUSTER

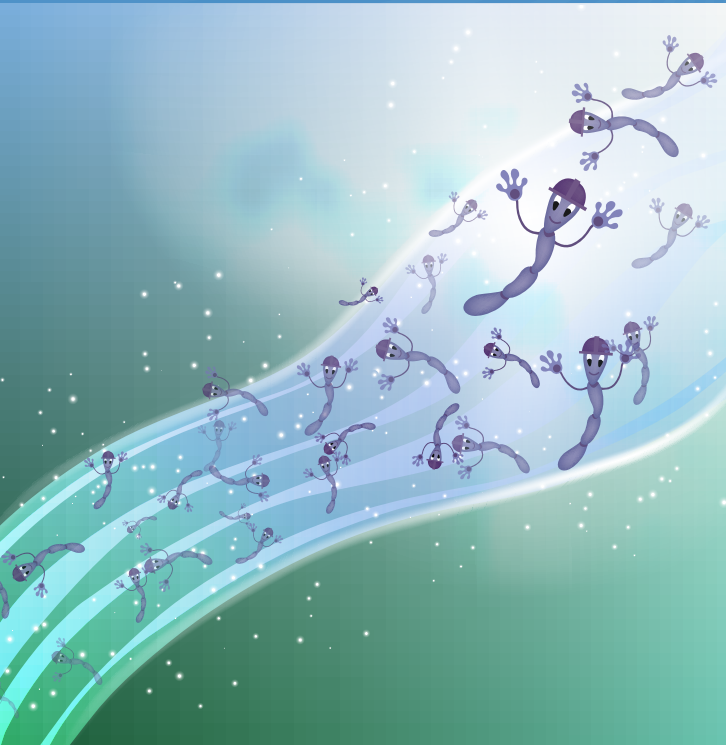

**CLEAR
IRRIGATION LINE
AND EMITTER CLOGS**

100% NATURAL INGREDIENTS

BENEFITS OF USING BIOFILM BUSTER INSTEAD OF CHEMICAL TREATMENTS

Irrigation lines are cool and damp — perfect conditions for biofilms and other clogs to form. When water mixed with fertilizer/nutrients runs through an irrigation line, this mixture carries small particles that “settle” when the line isn’t being used, allowing clogs to begin forming. Every time the irrigation line is used, this process repeats itself, until eventually the clog is large enough to block the irrigation line or emitters.

Biofilm clogs can be difficult to remove, and are resistant to most chemical treatments. Unlike harsh chemical treatments which are limited to the surface of the biofilm only, BioFilm Buster’s enzymes actively digest all biofilm layers, restoring your irrigation system to 100% capacity.

PREVENTATIVE TREATMENT

To prevent clogs before they are large enough to block your irrigation system use regularly every 4-8 weeks.

BIOFILM BUSTER WORKS!

“I am the vineyard manager for Charles Krug, located in the Napa Valley. Last year I had the opportunity to use the microbial product BioFilm Buster on our holding ponds and pipes.

We were told by AquaBella Organic Solutions that their product would help reduce sludge and organic material in our pipes. We did discover that this was true and the benefit that our sump pump did not get clogged was a great relief and time savings. In my previous experience the pumps filters would get clogged repeatedly, which was a real problem for us. We pumped out the pond multiple times and it went a lot smoother than in previous years.

We are still discovering additional benefits of using BioFilm Buster and will be using it again this year.”
