

TERRABELLA®

SUSTAINABLE SOIL CORRECTIVE & ROOT INOCULANT

- ❖ Promotes Nitrogen Fixation ❖ Promotes Vigorous Root Growth ❖
- ❖ Promotes Faster Growth and Higher Yield ❖
- ❖ Minimizes Transplant Shock ❖ Promotes Uniform Growth ❖

- ❖ Blend of Beneficial Root Zone Microorganisms ❖
- ❖ NPK Absorption ❖ Micronutrients ❖ Increases Biological Activity ❖
- ❖ For Both Conventional and Organic Farms ❖

“Feed Your Crops and Love Your Soil”

www.aquabellaorganics.com

- ❖ TerraBella contains a dynamic blend of beneficial naturally occurring soil microorganisms.
- ❖ TerraBella is a soil corrective that promotes root zone biological activity, including nutrient uptake in plants.
- ❖ TerraBella promotes nitrogen availability to plants.
- ❖ TerraBella promotes uniform ripening of treated plants.
- ❖ Boosts plant immune system and increases stress tolerance.

TERRABELLA APPLICATION TABLE				
TREATMENT AREA	1st Application: Between 2 weeks before planting to 2 weeks after planting		2nd Application: 3 weeks after first application	
	TerraBella	Non-Chlorinated Water	TerraBella	Non-Chlorinated Water
4000 sq. meters 1 Acre	500 mL (17 oz)	50 liters (13 gallons)	500 mL (17 oz)	50 liters (13 gallons)

DIRECTIONS FOR ACTIVATION: Mix the amounts of TerraBella and non-chlorinated water as indicated in the chart above in a non-metal container. Keep uncovered and out of direct sunlight between 10-32°C (50-90°F) for 48-72 hours, and then apply. **For best results, immediately follow TerraBella application with extensive watering.** Application schedule can be altered depending on growth cycle of plants. Contact Sales@AquaBellaOrganics.com for a suggested schedule.
